

Knowledge Organiser - Geography

Year: 1&2

Term: Summer 2

Topic: Picture a Better World

Vocabulary	Meaning
Environment	Everything that is around us including living and non-living things.
Littering	Dropping objects or leaving them lying on the ground instead of putting them in the bin.
Landfill	Burying waste or rubbish between layers of the earth.
Reduce	Using less and creating less waste.
Recycle	Making rubbish into something new and useful.
Reuse	Using the same thing more than once.

Reduce, Recycle, Reuse!

Sadly, some of our waste is thrown onto the floor. This is called litter. Littering is against the law!

Some of our rubbish is incinerated, which means it is burnt in very hot fires.

Some of the waste that we throw away goes into huge rubbish mountains that we call landfill.

The first step in making good decisions about our waste is to see if we can reduce it.

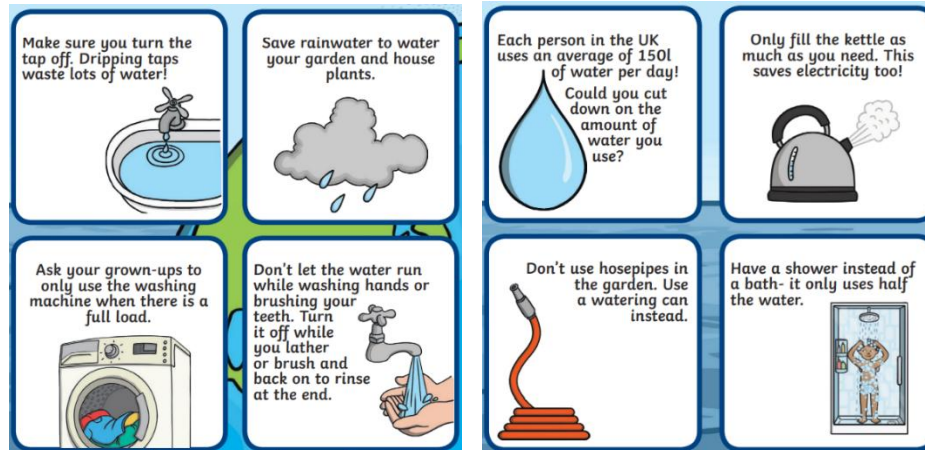

There are many ways in which we can help to **reduce** our waste and **reuse** our belongings.

If we cannot reuse things, we can **recycle**.

Recycling is where waste is melted down into a liquid or pulp before being used to create something else.

Water

Water is the most precious thing on Earth. Not one living thing on Earth can survive without it!

Learning Objectives

Lesson 1	I can suggest ways we can reduce, reuse and recycle.
Lesson 2	I can explain the importance of saving water and suggest ways to be water wise.
Lesson 3	I can explore ways to help my local environment by becoming carbon neutral.
Lesson 4	I can conduct a fieldwork study and show my results.
Lesson 5	I can show what I have learnt.
