Year: 1&2	**Term: Autumn 2**	**Topic: Celebrations – Sculpture and Printing**

Clay is a natural material which comes from the ground.

A pinch pot can be made by shaping and rolling clay with thumb and fingers. When it dries it becomes hard.

Divas are traditionally made from clay and are used to hold tealights.

They can be plain or highly decorated.

Sculpture is the art of making a 3D representation of objects.

Andy Goldsworthy is a famous British sculpture, and he creates his art from natural materials he finds outdoors in nature. He creates patterns such as snaking lines, spirals and circles.

Printing involves transferring ink or paint from a design onto a surface.

Monoprinting is a single impression of an image. It can only be printed once and not repeated.

Learning Objectives – Sculpture and Printing	
1	I can make a pinch pot diva lamp.
2	I can add decoration to my diva lamp using paint and sequins.
3	I know some facts about Andy Goldsworthy and the type of sculptures he creates.
4	I can design a picture inspired by the natural world to use for my monoprint.
5	I can print my monoprint picture.
